Helder Pedro

Software Developer | Computer Science Student

Luanda, Angola | helderk.j.pedro@gmail.com | +244 928 805 180 | https://helderpedro.satfogo.com

Summary

Computer Science student at Agostinho Neto University (UAN) and cadet at 42 Luanda. Hands-on experience in Full Stack development with Laravel, C and Python programming, and Linux system administration. Interested in algorithms, data structures, competitive programming and backend development. Goal: to become a software engineer able to design and optimise solutions to real-world problems.

Education

Agostinho Neto University (UAN) Oct 2026 – Present

Bachelor's Degree in Computer Science

42 Luanda Jul 2026 – Present

Cadet, project-based and peer-to-peer software engineering programme

Projects

iDuca (School Management System) Personal project, in development

Web-based school management platform for Angolan schools, built solo. Technologies: Laravel, PHP, JavaScript, Bootstrap, MySQL.

- Developed modules for student management, enrolment and yearly re-enrolment, classes and courses, teachers and subjects.
- Implemented tuition fee tracking, absences, assessments and grade sheets.
- Implemented academic year management, organising school data by period.

push_swap 42 Luanda

Sorting algorithms in C using two stacks and a limited set of operations.

- Implemented sorting algorithms in C using two stacks and limited operations.
- Optimised the number of moves required to sort the data.
- Managed memory allocation and deallocation.

ft_printf 42 Luanda

Reimplementation of the C printf function.

- Implemented the function in C with support for variadic arguments.
- Programmed the conversions and output formatting.

get_next_line 42 Luanda

C function that reads a file line by line from a file descriptor.

- Implemented line-by-line reading in C using file descriptors.
- Used buffering and dynamic memory allocation.

Born2beRoot 42 Luanda

System administration: Debian virtual machine configured from scratch.

- Configured a Debian virtual machine with LVM and LUKS encryption.
- Set up remote access via SSH and a UFW firewall.
- Managed users, groups and permissions.

Competitive Programming

- Participation in AtCoder Beginner Contests and ongoing practice on beecrowd, using Python and C++.
- Preparing for AoCPC; long-term goal: ICPC.

Technical Skills

Languages: C (proficient), Python (proficient), C++, PHP, JavaScript

Web and Desktop: Laravel (proficient), HTML5 and CSS3 (proficient), Bootstrap, Tailwind CSS, Electron

Databases: MySQL, SQLite

Systems and Tools: Linux, Debian, Git, GitHub, VirtualBox, Visual Studio Code, Vim

Fundamentals: algorithms, data structures, object-oriented programming, memory management, problem solving

Professional Experience

Freelance Web Developer Present
Luanda, Angola

- Developed several websites for clients, in continuous activity.

English, Portuguese and Handwriting Teacher (complementary experience) Mar 2017 – Feb 2022
Colégio Constância e Filho, Luanda

- Taught English, Portuguese and Handwriting, and served as term coordinator and class director.
- Developed communication, organisation and responsibility skills in a teaching environment.

Languages

Portuguese (native); English (advanced).
